<center>NetabaiGhelebFinalProject.py Data Validation</center>

Data Sets Tested

I tested two potential data sets when evaluating the program's data validation:

- The program was tested with a set of the bare minimum data input.
    - Name, Race, Class, Background, Feats/Abilities, and Character Notes fields were all left blank.
    - Stats were randomly rolled once.
    - No picture/logo was imported.
    - **Results:**
        - This test prompted me to program checks for each field's blank status in the pdf generation. As a result, in the event that any field is blank, the field will be explicitly not included in the generated pdf file or display text indicating that it was left blank.
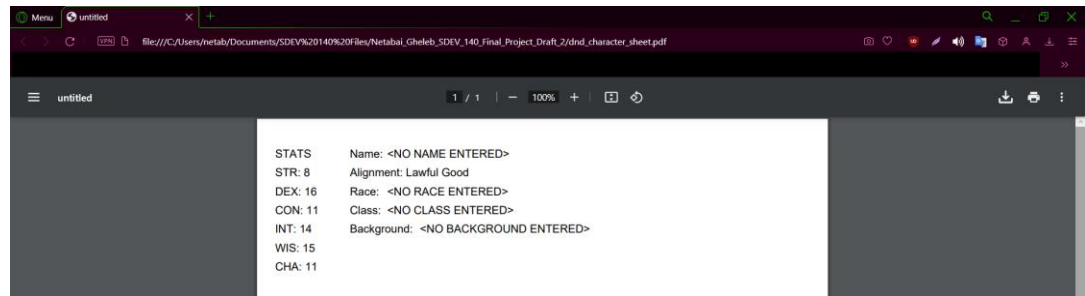

- A data set with all fields filled, barring Character Notes (as its properties are identical to Feats/Abilities.)
  - **Results:**
    - The program was executed as intended. During testing, this allowed me to visually verify and correct any positioning errors in the PDF generation.
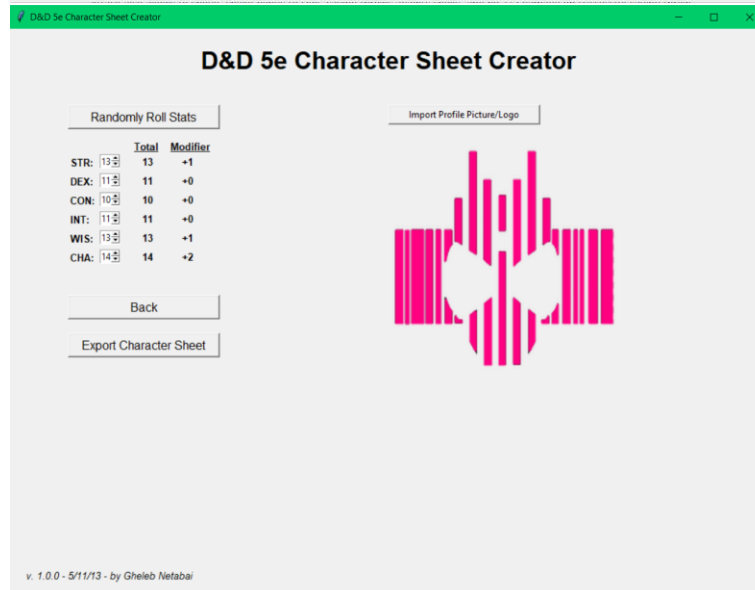

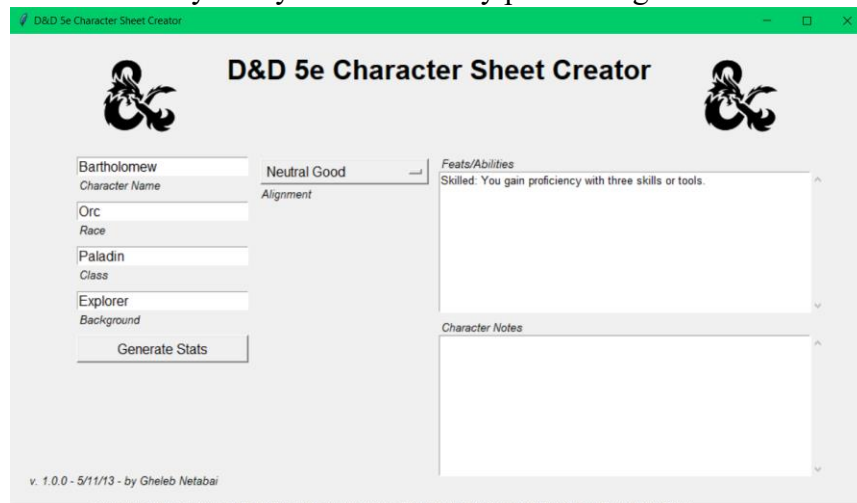

STATS
STR: 13
DEX: 11
CON: 10
INT: 11
WIS: 13
CHA: 14

Name: Bartholomew
Alignment: Lawful Good
Race: Orc
Class: Paladin
Background: Explorer
Feats/Abilities: Skilled: ■You gain proficiency with three skills or tools.
